

Now Certified in Dementia Care

Our staff is now certified in Dementia Care through the Crisis Prevention Institute in order to provide up-to-date, evidence-based care for our older patients.

The training has empowered our staff to deliver person-centered, dementia-capable memory care to give our patients an improved ability to function.

Built on the knowledge that persons with dementia can still feel joy, fulfillment and love, this training can enhance communication, minimize negative behaviors and create improved quality-of-life for our patients.

 We can provide the care you or a loved one needs. Call **972-487-5309** for a no-cost assessment or visit garlandbehavioralhospital.com to learn more.
